

Job Title:	Facility Manager
Location:	Amsterdam – The Netherlands (EU)
Employment Status:	
Reports To:	Director, R&D
Travel (%):	< 5%
<u>Major Roles & Responsibilities</u>	<p>Kraton is currently looking to hire a Facility Manager to support our R&D organization at our lab in Amsterdam. The overall purpose of this role is to act as the 'go to' person for the site regarding all facility/HSE related matters, and to contribute to site leadership for the local R&D team.</p> <p><u>Major Roles & Responsibilities:</u></p> <ul style="list-style-type: none"> • Execution of the facility management; building, equipment, utilities, contractor services and infrastructural project management. • Manage site budget and support regional R&D managers (E.g. provide monthly Capex overview). • Drive existing safety culture, and yearly safety tasks. • Implement and apply new safety procedures (internal, external – also based on local law). • Train and support staff with new procedures and processes. • Participate in the local safety committee and site leadership team. • Be a strong motivator, and be able to engage R&D team members in execution of overall plans and specific projects. <p><i>The statements above are intended to describe the general nature and level of work performed by employees assigned to this classification. Statements are not intended to be construed as an exhaustive list of all duties, responsibilities and skills required for this position.</i></p> <p><i>Kraton's internal talent acquisition team manages our recruiting efforts and from time to time works with pre-selected/pre-approved external staffing agencies. We do NOT accept unsolicited resumes or candidate referrals from recruiters and/or agencies who are not pre-selected/pre-approved.</i></p>
<u>Skills and Experience</u>	<ul style="list-style-type: none"> • Bachelor's degree in Engineering, Occupational Safety & Environmental Health, Facilities Management, or a related field. • Minimum of 5 years of relevant work experience in a polymer, chemical or pharmaceutical lab environment. • Experience in a leadership role (direct reports/project management/budget responsibility) is strongly preferred. • Knowledge of Dutch safety standards and regulations. • Strong influential management skills to motivate and engage R&D team. • Ability to manage and coach team members, with hands-on problem solving skills. • Strong communication skills; able to communicate at different levels in the organization. • Fluent in English and Dutch.
