

Job Title:	Technician
Location:	Almere – The Netherlands (EU)
Employment Status:	
Reports To:	Sr. Scientist
Travel (%):	< 5 %

Major Roles & Responsibilities

Kraton is looking to hire a new member of our R&D team in Almere.

The purpose of the Technician role is to provide laboratory synthesis, analytical, technical service and manufacturing support to scientists, to support the maintenance and growth of the business in target market segments. The Technician is expected to perform all duties in a safe manner, and to maintain a safe operating environment.

Major Roles & responsibilities

- Leverage experimental knowledge and demonstrate healthy behaviors to add value to the work environment
- Set up and conduct laboratory tests and experiments, record and analyze data, interpret data and make recommendations
- Operate experimental set-up and/or specialized analytical equipment; modify where necessary relevant to specific subject matter
- Carry out experimental work according to clearly defined safety and environmental guidelines with guidance from supervisor
- Produce quality data by the agreed upon deadlines
- Routinely purchase standard laboratory consumables and contribute to laboratory equipment installations and improvements.
- Inform supervisor of any experimental deviations from expected or specified values
- And other duties as assigned to safely perform

The statements above are intended to describe the general nature and level of work performed by employees assigned to this classification. Statements are not intended to be construed as an exhaustive list of all duties, responsibilities and skills required for this position.

Kraton's internal talent acquisition team manages our recruiting efforts and from time to time works with pre-selected/pre-approved external staffing agencies. We do NOT accept unsolicited resumes or candidate referrals from recruiters and/or agencies who are not pre-selected/pre-approved.

Skills and Experience

- At least 'MLO' (Intermediate Dutch Lab School) level
- Minimum 1 year related experience preferred
- Basic awareness of experimental techniques
- Understanding of equipment procedures required to execute experiments, and ability to translate procedures into a detailed working method
- Ability to communicate openly with team on experiment and procedure walk-throughs
- Demonstrated ability to obtain & organize experimental data according to methods indicated by supervisor
- Demonstrated ability to have components or auxiliary equipment made/ordered in consultation with supervisor
- High sense of safety awareness and responsibility for own working environment
- Critical thinking skills and ability to use good judgment in making decisions with guidance from supervisor
- Capable of engaging in multifunctional team to share and extract information
